

Amendments to the Specification:

Please amend the paragraph beginning on page 3, at line 16 as shown below:

In carrying out the above objects and other objects, the present invention provides a hands-free telephone system for a vehicle. The system includes a cell phone located in the vehicle. The cell phone is operable for enabling an operator to make a cell phone call with a phone external to the vehicle. The system further includes a vehicle appliance integrated into the vehicle. The vehicle appliance ~~having~~ has a controller, a communications module, memory, a display module, and a voice synthesizer. The communications module wirelessly communicates with the cell phone to detect when the cell phone receives an incoming call from an external phone having a telephone number and to receive the telephone number of the external phone from the cell phone. The memory stores a list of names and associated telephone numbers. The controller accesses the memory to locate a name stored in the memory corresponding to the telephone number of the external phone. The voice synthesizer outputs the name corresponding to the telephone number of the external phone over a vehicle speaker for the operator to hear.
